Add Google Maps to the Website!

If you want to integrate Google Maps and locations into the website, here is where you do it.

- When you click here, a new tab of “General Settings” will open.
- As you can see there are multiple options present here, where you have to click “Integrations”.
- Enter the Google Maps API Key in its dedicated section.

A screenshot of a web form for integrating Google Maps. It features the Google Maps logo on the left, followed by the text 'Google Maps (Enter Google Maps API Key)'. Below this is a text input field containing the placeholder text 'sdfsfsf'.

 **Google Maps** (Enter Google Maps API Key)

- Then click “Save Changes” to complete the process.

Congratulations! You have successfully added Google Maps and its services to your website.
